POINTS CLEARED

- ✓ Develop an application using HTML and PHP that displays a form in three consecutive pages one after the other taking different data from the user.
- ✓ After that, display all data entered in tabular format to the user.

EXPLANATION

Here I created the first page as index.php, where I take User's Name as the input and then put session constraints on the pages later on so that the same page cannot be accessed if link provided.

From Second page (Page2.php), I take input as User's Email, and on Third Page (Page3.php), I take input as User's Mobile No.

The Final page (Final.php),
Here I display the data transferred with the help of Session variable and POST method in tabular format.

I also used a little bit of CSS to present it more accurately and in organized manner.

HTML INPUT CODE (index.php)

```
<html>
  <head>
    <title>
      Page-1
    </title>
    <style type='text/css'>
      td{
        padding: 5px;
        font-size: 25px;
      }
      input{
        font-size: 18px;
        text-align: center;
      }
    </style>
  </head>
  <body>
    <center>
      <form method="post" action="Page2.php">
        <br/><br/>
        <table>
          <tr>
            <td>Name :</td>
            <td><input type="text" placeholder="Your Name" name="Name"></td>
          </tr>
          <tr><td><br/></td></tr>
          <tr>
            <td colspan="2" align="center"><input type="submit"></td>
          </tr>
        </table>
      </form>
    </center>
  </body>
</html>
```

HTML INPUT CODE (Page2.php)

```
<html>
  <head>
    <title>
      Page-2
    </title>
    <style type='text/css'>
      td{
        padding: 5px;
        font-size: 25px;
      }
      input{
        font-size: 18px;
        text-align: center;
      }
    </style>
    <?php
      session_start();
      if ($_POST['Name'] != ""){
        $_SESSION['Name']=$_POST['Name'];
      }
      else {
        header("Location: index.php");
      }
    ?>
  </head>
  <body>
    <center>
      <br/><br/>
      <form method="POST" action="Page3.php">
        <table>
          <tr>
            <td>Email :</td>
            <td><input type="email" name="Email" placeholder="Your Email"></td>
          </tr>
          <tr><td><br/></td></tr>
          <tr>
            <td colspan="2" align="center"><input type="submit"></td>
          </tr>
        </table>
      </form>
    </center>
  </body>
</html>
```

HTML INPUT CODE (Page3.php)

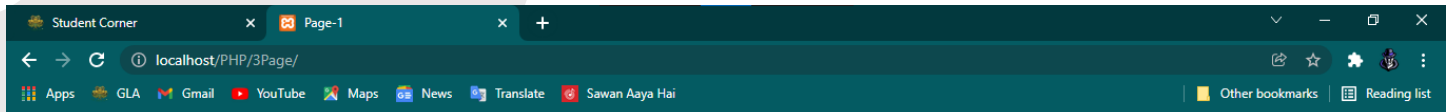

```
<html>
  <head>
    <title>
      Page-3
    </title>
    <style type='text/css'>
      td{
        padding: 5px;
        font-size: 25px;
      }
      input{
        font-size: 18px;
        text-align: center;
      }
    </style>
    <?php
      session_start();
      if ($_POST['Email'] != ""){
        $_SESSION['Email']=$_POST['Email'];
      }
      else {
        header("Location: index.php");
      }
    ?>
  </head>
  <body>
    <center>
      <form method="POST" action="Final.php">
        <br/><br/>
        <table>
          <tr>
            <td>Mobile :</td>
            <td><input type="text" pattern="[0-9]{10}" name="Mob"
placeholder="Your Mobile"></td>
          </tr>
          <tr><td><br/></td></tr>
          <tr>
            <td colspan="2" align="center"><input type="submit"></td>
          </tr>
        </table>
      </form>
    </center>
  </body>
</html>
```

HTML INPUT CODE (Final.php)

```
<html>
  <head>
    <title>
      Final
    </title>
    <style type='text/css'>
      td,th{
        padding: 5px;
        font-size: 25px;
        border: 1px solid black;
      }
      input{
        font-size: 18px;
        text-align: center;
      }
      table{
        border: 2px solid black;
        border-spacing: 0px;
      }
    </style>
    <?php
      session_start();
      if (isset($_SESSION['Name']) && isset($_SESSION['Email']) &&
isset($_POST['Mob'])){
        $Name = $_SESSION['Name'];
        $Email = $_SESSION['Email'];
        $Mobile = $_POST['Mob'];
      }
      else {
        header ("Location: index.php");
      }
    ?>
  </head>
  <body>
    <center>
      <br/><br/>
      <table>
        <tr>
          <th>Name</th>
          <th>Email</th>
          <th>Mobile</th>
        </tr>
        <tr>
          <?php
            echo"<td>$Name</td>
            <td>$Email</td>
```

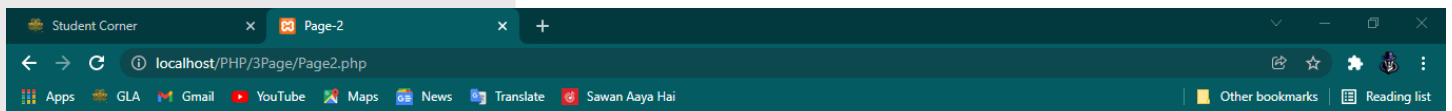

```
        <td>$Mobile</td>";  
    ?>  
    </tr>  
    </table>  
    </center>  
    </body>  
</html>  
<?php  
    session_destroy();  
?>
```
